PLANT  
CONSTRUCTION

The EPC Group is an internationally active engineering and plant construction company as well as provider of innovative technologies. The company's activities are focused on the planning and implementation of infrastructure projects and industrial facilities in the areas of chemicals and pharmaceuticals, polymers and fibers, technical gases, biotechnology as well as renewable energy. With over 140 years of engineering tradition the family business is now represented by over 300 highly motivated professionals at eight locations in Germany and one office in Russia.

We are currently looking for a new member to join our team in Alzenau:

## PROCESS AUTOMATION ENGINEER (M/F)

### YOUR RESPONSIBILITIES

- Planning of projects for the chemical industry in cooperation with the responsible technical departments
- Designing of automation concepts and required specifications
- Configuration of the process control systems (preferably Yokogawa and / or Siemens)
- Processing of orders with suppliers
- Preparation of documents for safety assessments and regulatory approval
- Commissioning of the automation systems and the connected electrical, measuring and regulatory field devices
- Consultation and support of the clients regarding changes, modifications and extension of the plant in the sector of process control
- Conduct malfunction and error analyses

### YOUR QUALIFICATIONS

- University degree or further training with a certificate as "Master" or "Technician" (e.g. in the field of electrical engineering, measurement technology, automation technology or similar qualifications)
- Working experience in operational management or detailed E/I&A-planning is an advantage
- Skills in Step Sequence Programming, network technology and / or Profibus are an advantage
- Strong communicative skills and a high degree of customer orientation
- Ability to work in a team, flexible and interest in varied tasks
- Ability to work independently, result-oriented and a profound sense of responsibility
- Willingness to travel for the implementation of projects
- Knowledge of applicable industry standards and rules
- Working experience with CAD- and CAE-systems is an advantage
- Language skills in German, English and / or Russian are an advantage
