PLANT
CONSTRUCTION

The EPC Group is an internationally active engineering and plant construction company as well as provider of innovative technologies. The company's activities are focused on the planning and implementation of infrastructure projects and industrial facilities in the areas of chemicals and pharmaceuticals, polymers and fibers, technical gases, biotechnology as well as renewable energy. With over 140 years of engineering tradition the family business is now represented by over 300 highly motivated professionals at eight locations in Germany and one office in Russia.

We are currently looking for an

ELECTRICAL DESIGN ENGINEER

to join our team in Arnstadt:

YOUR RESPONSIBILITIES

- Basic and detailed planning of electronic infrastructures in cooperation with other plant engineering departments
- Development of customer-specific solutions
- Design of switchgears and selection of secondary components
- Dimensioning of cables according to current carrying capacity, voltage drop, fuse protection and installation type
- Preparation of P&I diagrams
- Technical processing of procurement activities and assistance in cost estimation
- Preparation and administration of technical manuals and documentations
- Preparation of necessary installation instructions, wiring diagrams and further production documents

YOUR QUALIFICATIONS

- University degree or further training with a certificate as "Master" or "Technician" (e.g. in the field of Electrical Engineering, or similar qualifications)
- Working experience in similar projects
- Strong communication skills and a high degree of customer focus
- Ability to work in a team, flexibility and interested in varied tasks
- Ability to work independently, result-oriented and a profound sense of responsibility
- Willingness to travel to support project deployments
- Knowledge of relevant industry standards and regulations
- Working experience with CAD and CAE
- Language skills in German and English (Russian is a plus)
