PLANT
CONSTRUCTION

The EPC Group is an internationally active engineering and plant construction company as well as provider of innovative technologies. The company's activities are focused on the planning and implementation of infrastructure projects and industrial facilities in the areas of chemicals and pharmaceuticals, polymers and fibers, technical gases, biotechnology as well as renewable energy. With over 140 years of engineering tradition the family business is now represented by over 300 highly motivated professionals at eight locations in Germany and one office in Russia.

We are currently looking for an:

CHEMICAL / PROCESS ENGINEER

to join our team in Arnstadt:

YOUR RESPONSIBILITIES

- Planning of chemical production plants
- Independent project management during conception, basic and detail engineering
- Development of process and plant descriptions
- Layout and creation of project-specific cost estimates and calculations
- Preparation of process and R&I diagrams
- Calculation of mass and energy balances as well as process design of devices and machines
- Commissioning of plants
- Support of sales team in process-related preliminary considerations
- Support of safety concepts

YOUR QUALIFICATIONS

- University degree (e.g. in the field of Chemical Engineering, Process Engineering, Chemical Technology, or similar qualifications)
- Working experience in processing and planning of similar projects in the chemical plant construction sector
- Strong communication skills and a high degree of customer focus
- Ability to work in a team, flexibility and interest in varied tasks
- Ability to work independently, result-oriented and a profound sense of responsibility
- Willingness to travel to support project deployments
- Good knowledge of MS-Office
- Working experience with CAD and CAE
- Language skills in German and English (Russian is a plus)
